

2013-2014 Energy Efficiency Programs Energy Challenger Program Implementation Plan

The Program has close linkages with SoCalGas's portfolio of energy efficiency programs for small and medium sized business customers including; Express Efficiency, Savings by Design and Energy Efficiency Business Seminars.

f) Integration Across Resource Types (energy, water, air quality, etc)

The Program is primarily focused on improvements in energy resource management. In addition, the Program includes assessment of water efficiency opportunities where the energy measure/technology also has a water resource component (e.g. low flow shower heads and pre-rinse valves on dishwashers). That is, the measure/technology delivers both improvements to energy and water efficiency.

g) Pilots

The Program for –2013 - 2014 is an extension of an existing 2010-2012 program and as such does not include any pilot projects. The program design and delivery has been continuously improved based on feedback received during the 2006-08 cycle.

h) EM&V

The utilities are proposing to work with the Energy Division to develop and submit a comprehensive EM&V Plan for –2013 - 2014 after the program implementation plans are filed. This will include process evaluations and other program-specific studies within the context of broader utility and Energy Division studies. More detailed plans for process evaluation and other program-specific evaluation efforts cannot be developed until after the final program design is approved by the CPUC and in many cases after program implementation has begun, since plans need to be based on identified program design and implementation issues.

7. Diagram of Program

No specific program diagram for this third party program has been developed. Any program linkages are discussed in Section 6. However, a diagram of the Program's structure is provided below.
